**What is it about?**  
This Major is designed for students seeking a broad-based training in modern biology. Students are guided in an inquiry-driven learning environment to appreciate the major biological systems at different levels of biological organisation. Teaching emphasizes both core concepts and applied aspects in biological sciences. The programme is highly flexible as students can select courses according to their own interests from a wide spectrum of elective courses. At the advanced level, students are further exposed to three fundamental areas of biological sciences (genetics, molecular & cell biology; ecology, systematics and evolution; physiology and organismic biology) and will undertake experiential learning activities.

**Offering Department:**  
Offered by the School of Biological Sciences

**Pre-requisites and/or other conditions for declaring the major/minor:**  
Please refer to the course prerequisites of the required courses.  
For details, please check with the School of Biological Sciences.

**Career opportunities:**  
The diverse learning experience exposes students to problem-based learning, and an exciting array of laboratory and field techniques. Students will also be able to acquire valuable transferable skills in analysis, organisation and communication. The Biological Sciences Major applies modern scientific inquiry to prepare graduates for employment as professionals in a variety of careers or for postgraduate study.  
For details, please check with Faculty or CEDARS (Careers & Placement).
