Postgraduate Studies: Is it for me? If so, when and where?

Next Steps

**Question**
- Do I have clearly defined career goals that require an advanced degree?
- Am I able to articulate my academic and professional reasons for continuing studies?
- Does my undergraduate record reflect my ability to do graduate level work?
- Will I be able to incur the financial obligations and delay earnings that continuing my education will involve?
- Am I personally ready for additional years of academic work at a more rigorous level and requiring greater self-discipline?

**Action**
- Discuss with support network (faculty adviser, professional mentors, family members).
- Decide when to attend graduate school.
- Consider test preparation and register for required admission tests (GRE, GMAT, TOFEL), if required.
- Finalize list of selected schools. A suggested guideline is 3-5.
- Review the application deadlines and requirements for the schools selected and create an application schedule.
- Prepare required documents according to specific instructions of each institution. Remember to allow additional time for letters of recommendation.

**Follow-up**
- While waiting for admission decisions, continue to academically prepare and pursue related interests. Also use this time to determine a backup plan depending on the competitiveness of the schools and other alternatives.
- Evaluate offers and respond with decision.

**Consider the Alternatives**
- Gain professional experience and earn an income
- Seek additional training through community and university extension programs
- Obtain a professional association certificate
- Improve your language proficiency and gain an international perspective living abroad
- Apply for internship and fellowship programs
- Consider formally continuing your studies at a later point

Making the Comparison

**Hints**
- Consider the strengths of the program in your field more than the general reputation of the university.
- Ask professionals and faculty in the field you intend to pursue for their advice on specific programs.
- Network and discuss your interests at academic conferences and lectures.
- Go to the library and review journals in your field. See which professors are doing research and publishing in your area of interest.
- Visit the schools that you are interested in, if possible, and talk with faculty and current graduate students for a better perspective.
- Rankings are a useful indicator; however don’t rely solely on them. Find the program that is the best fit for your academic pursuits.
Both coursework and research completed in a specific discipline; thesis or dissertation typically required. Especially important for work in academic and consulting fields.

Heavily focused on research and thesis required to complete degree. Generally needed to obtain professional position in research field.

Might include practicum or require professional experience. Thesis not generally completion requirement. Licensing test offered at completion of some programs.

- Master of Arts (M.A.)
- Master of Science (M.S.)
- Doctor of Philosophy (Ph.D.)

- Master of Philosophy (M.Phil.)
- Doctor of Philosophy (Ph.D.)

- Medical Doctor (M.D.)
- Doctor of Jurisprudence (J.D.)
- Master of Business Administration (M.B.A.)
- Master of Education (M.Ed.)

**What is Important to Me?**

Create a comparison chart. Items on the chart might include: application deadline, admission requirements, total estimated annual cost (tuition, fees, and living), estimated length to complete degree, information about the location and student environment, schedule possibilities (full-time/part-time, weekdays, nights), key faculty members, areas of expertise, degree emphasis, strengths of program, weaknesses of program, and any other items that address the question: what is important to me?
Financial Planning

Develop a separate budget worksheet for each option you are considering. This is a general idea to get you started. Adapt to meet your specific situation.

<table>
<thead>
<tr>
<th>Item</th>
<th>Amount per year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition and fees</td>
<td>+</td>
</tr>
<tr>
<td>Books and supplies</td>
<td>+</td>
</tr>
<tr>
<td>Travel and transportation expenses</td>
<td>+</td>
</tr>
<tr>
<td>Estimated housing and living cost</td>
<td>+</td>
</tr>
<tr>
<td>Personal expenses</td>
<td>+</td>
</tr>
<tr>
<td>Other financial obligations:</td>
<td>+</td>
</tr>
<tr>
<td>Scholarships and awards</td>
<td>-</td>
</tr>
<tr>
<td>Possible employment</td>
<td>-</td>
</tr>
<tr>
<td>Other sources of income:</td>
<td>-</td>
</tr>
<tr>
<td>Years of attendance</td>
<td>X</td>
</tr>
<tr>
<td>Estimated total cost</td>
<td>=</td>
</tr>
</tbody>
</table>
